

Annual Report 03/2022

Nomura Real Protect Fonds

Investment fund under German law

As at 31 March 2022

Foreword

July 2022

Dear Investor,

We hereby submit the annual report for our mutual fund

Nomura Real Protect Fonds

as at 31 March 2022.

Information about changes in the fund's value can be found on the following pages.

Best wishes from Frankfurt,

Nomura Asset Management Europe KVG mbH

The Executive Board

Magnus Fielko

Gerhard Engler

Activity Report

Review

Global inflation-linked bonds performed well again during the reporting period and, unlike nominal bonds, showed a positive return. Real yields to maturity, which are the relevant yields for this asset class, declined in 2021 and subsequently showed a mixed trend. The eurozone avoided the global upward trend in yields in the first quarter of 2022 due to the comparatively large impact of the Ukraine conflict on Europe. The fund is not directly affected by the war since it only invests in highly rated OECD countries and holds no Russian or Ukrainian bonds.

Overall, the real yield on the 10-year inflation-linked US Treasury bond rose moderately from -0.6% to -0.5%, while the real yield on the 10-year inflation-indexed bund slid from -1.7% to -2.2%. By comparison, the yield on the comparable 10-year nominal US bond rose considerably from 1.7% to 2.4%, while 10-year bunds saw their yield rise a similar amount from -0.3% to +0.5%.

The lifting of most of the restrictions imposed during the COVID-19 crisis, together with very expansive fiscal policy, significantly increased demand in the reporting period. The supply side of the market was unable to respond to this quasi-simultaneous global surge in demand as nimble as it had in previous years because capacity was no longer or not yet available in some parts of the world. Supply bottlenecks ensued, from raw materials through transport capacity all the way to special production parts. This led to significant price increases in nearly all areas. The effect was exacerbated by the supply shortage in that companies did more than just replenish their initially significantly reduced inventories; some engaged in precautionary buying, too. The military conflict in Ukraine produced another global increase in energy and food prices in particular in 2022. Europe was particularly affected due to its heavy dependence on natural gas imports.

Inflation rates rose significantly as a result. In the US, the annual rate of change in the consumer price index rose from 2.6% in March 2021 to 8.5% in March 2022. The increase was similarly large in the European Monetary Union where the rate went from 1.3% in March 2021 to 7.4% in March 2022. The UK Retail Price Index – which is important to the fund due to Britain's heavy market weighting – was up 1.5% year-on-year in March and 9.0% in September.

GDP continued to grow strongly in the reporting period. Growth started to weaken in the third quarter but indicators such as the OECD leading indicators continue to show that the economy is in the middle of an expansionary phase. The widely varying scope of expansionary fiscal policy and measures taken to limit COVID-19 in the individual countries affected how fast the various economies grew and how far advanced

the individual countries are in the business cycle. The eurozone is lagging behind other regions in this regard.

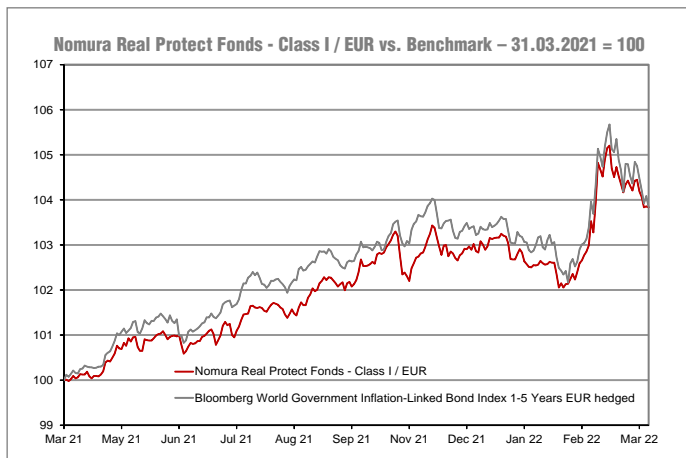

The central banks did not change their monetary policy until very late in the reporting period because the economic risks from COVID-19 loomed large for a long time and the rapid rise in inflation was seen as a short-lived, temporary phenomenon. The Fed, the Bank of England and other central banks have recently responded to high inflation by raising key interest rates. The ECB, for its part, has only held out the prospect of ending bond purchases before potentially hiking interest rates at some unspecified time in the future. The Bank of Japan, in contrast, left its monetary policy unchanged.

The gap between nominal bond yields and real yields on inflation-linked bonds, i.e. breakeven inflation, was very volatile in the reporting period and varied between the individual countries and regions. Shorter-term implied inflation expectations increased significantly from 1.2% to 3.1% p.a. in the eurozone and from 3.4% to 4.7% p.a. in the UK, while 10-year average inflation expectations increased from 1.3% to 2.6% in the eurozone and from 3.6% to 4.3% in the UK. By contrast, inflation expectations in the US, which had risen sharply in previous quarters, changed very little on balance. For example, the spread for 10-year Treasuries rose from 2.4% at the beginning of the reporting period in May 2021 to just under 2.8%. The implied breakeven inflation rate for 5-year US bonds saw a net increase from 2.6% to as much as 3.4%.

Investment policy

The Nomura Real Protect Fonds invests in the bonds of OECD countries or in bonds guaranteed by these countries on a largely currency-hedged basis, with the majority being inflation-linked bonds. In terms of interest rate risk, the fund is based on the average maturity of the 1-5-year benchmark. This should achieve the main objective of real capital preservation with a simultaneous reduction in volatility compared with the overall market capitalisation of inflation-linked bonds.

Differences between real yields are arbitrated on a currency-hedged basis in the investment process. For example, Canadian, Australian

and New Zealand inflation-linked bonds were particularly attractive on this basis and were therefore overweighted. Inflation dynamics also play a role. The US implemented a comparatively strong fiscal stimulus and lifted coronavirus protection measures earlier than the eurozone, and inflation initially accelerated faster in the US than in the eurozone. The US was therefore overweighted in the portfolio at the beginning of the reporting period. In the US, part of the interest rate risk of the inflation-linked bonds was hedged for much of the reporting period by selling nominal bond futures. The fund benefited from the rise in market-based inflation expectations in the US as the gap between nominal and real returns widened.

Inflation in the eurozone then began catching up in the third quarter of 2021. Since that meant market-based inflation expectations were more favourable in the eurozone than in the US at the middle of the year, with growing signs of positive inflation momentum, we scaled back our exposure to the US segment and increased our exposure to the EUR segment.

Valuation differences between maturities are also arbitrated. For example, in the US, we identified opportunities primarily in shorter maturities and consequently overweighted them. In contrast, we overweighted inflation-linked bonds in the 5-year maturity range in the eurozone.

Spread risk between countries in the eurozone is actively managed. Italy, for example, was overweighted in 2021 because we expected the ECB's bond purchases and the EU's Recovery Fund to provide positive support for bonds from countries in the European periphery. We have reduced risk in Italy with the ECB's bond purchases coming to an end. We also reduced our exposure in France since we view its risk/reward ratio as generally below average due to the upcoming parliamentary elections.

Risks

The investment fund's market price risk was low and comparable to that of the benchmark during the reporting period due to interest rate changes.

The investment fund was hedged as far as possible for the shares invested in foreign currency.

The liquidity risk was consistently monitored during the reporting period and is relatively low as the bonds are liquid government bonds. No defaults were observed. The default risk is assessed to be very low.

During the reporting period, the investment fund was generally exposed to operational risks in the processes of the capital management company but did not show any increased operational risk.

Disposal results

The realised gains and losses are primarily the result of sales of US government bonds and forward exchange contracts for the currency USD.

Outlook

The drastic rise in energy future prices will continue to drive up consumer prices for some time, especially in Europe. In the US, by contrast, wage growth and core inflation have picked up significantly. The US already has a concerning wage-price dynamic that justifies the current elevated market-based inflation expectations for the US.

This trend will likely reach the eurozone as well, which poses a challenge for the ECB's monetary policy.

Eurozone inflation is currently being driven largely by energy and food prices, which have been recently heavily affected by the war in Ukraine.

The recent resurgence of COVID-19 in Asia could also cause supply chain problems for inputs. Central banks will probably not succeed in getting inflation under control quickly since they have no control over supply shortages and can, at best, only reduce demand. Structural reasons for higher inflation over the long term include the demographically induced labour shortage, deglobalization and the environmental transformation of the economy.

Regardless of the economic scenario, inflation-linked bonds offer a more balanced risk/reward ratio than nominal bonds since inflation compensation will offset price losses from yield increases in the event of upside inflation surprises and interest rate hikes. The reverse is obviously true in the event of surprises to the downside.

Disclosure of procedures for the valuation of assets

The assets of the investment fund are valued on the basis of the German Capital Investment Accounting and Valuation Ordinance at the following prices/market rates:

Type of security	Region	Valuation date	Section 27 Valuation at tradable prices	Section 28 Valuation using valuation models	Section 32 Special issues for the valuation of equity interests	Section 29 Special issues for investment shares, bank balances and liabilities
Bonds						
	Germany	31/03/2022	3.87 %			
	Europe	31/03/2022	28.96 %			
	Australia	31/03/2022	13.21 %			
	North America	31/03/2022	38.35 %			
Derivatives – forward exchange contracts						
		31/03/2022		-1.47 %		
Other assets						
		31/03/2022				17.08 %
			84.39 %	-1.47 %		17.08 %

The percentage figures indicate the share of individual assets relative to the total fund assets.

Annual Report of the Investment Fund Nomura Real Protect Fonds as at 31/03/2022

The valuation principles of the company are based on Sections 26–28 of the German Capital Investment Accounting and Valuation Ordinance (“KARBV”).

The valuation of the assets is made by the depositary. The principles applied by the depositary for the valuation of the asset positions are documented by the depositary and submitted to the capital management company. On each valuation date, the valuations provided by the depositary undergo specified plausibility checks to identify irregularities in the capital management company. As per the reporting date, all valuation sources quoted by the depositary continued to be documented and archived at the capital management company.

Assets that are admitted to trading on, or included in, a stock exchange or other organised market are valued at the latest available tradable prices. Investment shares are valued at the companies' prices on the previous day. The prices of the depositary are generally obtained from ValueLink Information Services. If no price is provided by ValueLink Information Services, prices provided by known rate providers (e.g. Bloomberg or Reuters) can be used.

If the fund is invested in products for which no tradable price is available at the reporting date, the valuation of the assets is made on the basis of external valuation models (e.g. DCF method), which are used by independent price providers (e.g. Value & Risk).

Bank deposits and existing receivables are valued at their current nominal value. Existing liabilities are valued at the amounts payable.

Exchange rates	as at	31/03/2022	
Australian dollar	(AUD)	1.481700	= EUR 1

Annual Report of the Investment Fund Nomura Real Protect Fonds as at 31/03/2022

Ongoing Charges Figure (OCF)

The ongoing charges figure expresses the sum of all costs and fees (excluding transaction costs, including target fund costs) as a percentage of the average fund volume within a fiscal year.

Share class – Class I / EUR	0.50 %
Share class – Class R / EUR	0.90 %
Share class – Class I / USD	0.51 %

No flat-rate fees were paid to the management company or third parties.

The capital management company does not receive reimbursements of the fees and reimbursements paid out of the fund to the depositary or to third parties. The management company pays a significant portion of its management fee to intermediaries of fund shares for holdings of units.

Other significant income and other expenses

Share class – Class I / EUR

The other expenses consist of custody fees of EUR 31,386.56.

Share class – Class R / EUR

The other expenses consist of custody fees of EUR 4,366.73.

Share class – Class I / USD

The other expenses consist of custody fees of USD 3.74.

Transaction costs (sum of ancillary costs of acquisition (acquisition costs) and costs of disposal of assets)

The transaction costs incurred in the reporting period for the account of the investment fund amount to EUR 6,736.30.

The transaction costs include counterparty, delivery and stock exchange fees, taxes and commissions. In some types of transaction (including annuity transactions), the commissions are not shown separately in the billing but are already included in the respective price and therefore not included in the above tax.

During the reporting period, no transactions subject to Regulation (EU) 2015/2365 on securities lending transactions were entered into.

Annual Report of the Investment Fund Nomura Real Protect Fonds as at 31/03/2022

Information on employee remuneration (in thousands of euros (TEUR))

Total of the remuneration paid to CMC in the past fiscal year	TEUR 8,883
of which fixed remuneration	TEUR 6,206
of which variable remuneration	TEUR 2,677
Number of employees of CMC (including managing directors) on 31 March 2022 (number)	56
Total amount of remuneration paid to managers and other risk carriers in the past fiscal year of CMC	TEUR 3,798
of which managing directors	TEUR 921
of which other risk carriers	TEUR 1,245
of which employees with positions of control	TEUR 265
of which employees with the same remuneration category	TEUR 1,367

The term "managing director" includes all managers within the risk carriers.

Description of how the remuneration and any other benefits were calculated

The amount of the remuneration results from a fixed base salary, to which a variable component (bonus) was additionally paid.

The bonus is calculated based on the fulfilment of the employee's objectives, the results of the capital management company and the results of operations of the parent company.

Results of the annual review of the remuneration policy

The independent Compensation Committee of the capital management company, which is made up of members of the owner, the Supervisory Board and the Human Resources department, reviewed and approved the remuneration scheme at the annual meeting.

Annual Report of the Investment Fund Nomura Real Protect Fonds as at 31/03/2022

Report on the consolidated financial statements by the independent auditor

To Nomura Asset Management Europe KVG mbH

Auditor's opinion

We have audited the annual report of the investment fund Nomura Real Protect Fonds, comprising the activity report for the fiscal year from 1 April 2021 to 31 March 2022, the statement of assets and liabilities and the statement of net assets as per 31 March 2022, the profit and loss account, the cash flow statement, the development statement for the fiscal year from 1 April 2021 to 31 March 2022 and the comparative overview of the last three fiscal years, the list of transactions concluded during the reporting period that no longer appear in the statement of net assets, and the notes to the financial statements.

In our opinion, based on the findings obtained during the audit, the attached annual report corresponds in all material matters to the provisions of the German Investment Code (KAGB) and the relevant European regulations and, in compliance with these regulations, make it possible to obtain a comprehensive picture of the actual circumstances and developments of the investment fund.

Basis for the auditor's opinion

We have conducted our audit of the annual report in accordance with Section 102 KAGB in compliance with the generally accepted standards for the audit of financial statements determined by the Institute of Public Auditors in Germany (IDW). Our responsibility under these regulations and principles is described in more detail in the "Responsibility of the auditor for the audit of the annual report" section of our report. We are independent of Nomura Asset Management Europe KVG mbH in accordance with German commercial and professional regulations and have fulfilled our other German professional obligations in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to serve as a basis for our opinion on the annual report.

Other information

The legal representatives are responsible for the other information. The other information includes the components "Legal information" and "Development of unit value, unit sales and fund assets" for the "Annual Report 03/2022". We received a version of this information up to the issue of this report.

Our audit opinion on the annual report does not extend to the other information, and accordingly, we do not issue an audit opinion or any other form of audit conclusion on it.

In connection with our audit, we have the responsibility to read the other information and to assess whether the other information

- contains material discrepancies from the annual report or our knowledge acquired during the audit, or
- appears to be otherwise materially misrepresented.

If, on the basis of the work we carry out, we conclude that there is a material misrepresentation of this other information, we are obliged to report on this fact. We have nothing to report in this regard.

Annual Report of the Investment Fund Nomura Real Protect Fonds as at 31/03/2022

Responsibility of the legal representatives for the annual report

The legal representatives of Nomura Asset Management Europe KVG MBH are responsible for the preparation of the annual report which complies with the provisions of the German KAGB and the relevant European regulations in all material matters, and for ensuring that the annual report, in compliance with these regulations, makes it possible to obtain a comprehensive picture of the actual circumstances and developments of the investment fund. In addition, the legal representatives are responsible for the internal controls that they have identified as necessary in accordance with these provisions in order to enable the preparation of an annual report which is free from material – intentional or unintentional – misrepresentations.

When preparing the annual report, the legal representatives are responsible for incorporating events, decisions and factors that could have a material impact on the further development of investment assets into the reporting. This means, among other things, that during the preparation of the annual report, the legal representatives have to assess the continuation of the investment fund by Nomura Asset Management Europe KVG mbH and have the responsibility to disclose facts connected with the continuation of the investment fund, if relevant.

Responsibility of the auditor for the audit of the annual report

Our objective is to obtain sufficient assurance as to whether the annual report as a whole is free from material – intentional or unintentional – misrepresentations, and to issue a report that includes our audit opinion on the annual report.

Sufficient assurance is a high degree of assurance but not a guarantee that an audit conducted in accordance with Section 102 KAGB and in compliance with the generally accepted standards for the audit of financial statements determined by the Institute of Public Auditors in Germany (IDW) will always uncover a material misrepresentation. Misrepresentations may result from violations or inaccuracies and are considered to be material if it could reasonably be expected that they, individually or as a whole, could influence the economic decisions of the addressees taken on the basis of this annual report.

During the audit, we exercise our duty of discretion and maintain a critical attitude. In addition:

- We identify and assess the risks of material – intentional or unintentional – misrepresentations in the annual report, plan and conduct audit procedures in response to these risks and obtain audit evidence that is sufficient and suitable to serve as a basis for our audit opinion. The risk that material misrepresentations will not be discovered is higher for violations than for inaccuracies, since violations may include fraudulent conduct, counterfeits, intentional omissions, misleading representations and derogation of internal controls.
- We gain an understanding of the internal control system relevant to the audit of the annual report in order to plan audit procedures that are appropriate in the given circumstances but not with the objective of expressing an audit opinion on the effectiveness of the internal control system of Nomura Asset Management Europe KVG mbH.
- We assess the adequacy of the accounting methods applied by the legal representatives of Nomura Asset Management Europe KVG mbH in the preparation of the annual report and the justifiability of the estimated values and related information presented by the legal representatives.
- We draw conclusions based on audit evidence obtained as to whether there is material uncertainty in relation to events or circumstances that could cast significant doubts on the continuation of the investment fund by Nomura Asset Management Europe KVG mbH. If we conclude that there is a material uncertainty, we are obliged to draw attention to the relevant information in the annual report or, if this information is inappropriate, to modify our audit opinion. We draw our conclusions based on the audit evidence obtained up to the date of our report. However, future events or circumstances may lead to the investment fund not being continued by Nomura Asset Management Europe KVG mbH.
- We assess the overall presentation, structure and content of the annual report, including the disclosures and whether the annual report represents the underlying transactions and events in such a way that the annual report, in compliance with the provisions of the German KAGB and the relevant European regulations, makes it possible to obtain a comprehensive picture of the actual circumstances and developments of the investment fund.

Annual Report of the Investment Fund Nomura Real Protect Fonds as at 31/03/2022

We discuss, among other things, the planned scope and timing of the audit, as well as significant audit findings, including any deficiencies in the internal control system that we find during our audit, with the managers responsible for monitoring.
